

SULTAN BAYU PRASETYO

Jakarta, Indonesia | sultanbp18@gmail.com
[linkedin.com/in/sultanbp](https://www.linkedin.com/in/sultanbp) | github.com/sultanbayup | sultanbp.com

Cloud / Platform Engineer with nearly 4 years operating production Kubernetes and GCP infrastructure, cutting cloud spend by up to 60% through rightsizing, legacy-service migration, and committed-use discounts. Hands-on with Terraform in self-built lab platforms, plus Ansible, Helm, and GitOps in production operations..

Experience

PT. Ebconnect Indonesia, Jakarta — Cloud Engineer

JUL 2025 - PRESENT

- Reduced monthly cloud spend by ≈150M IDR/month (≈\$8,550) by eliminating unused resources, right-sizing compute, migrating legacy Cloud SQL instances off extended support, and applying committed-use discounts.
- Migrated 5 applications and databases from on-premises infrastructure to Google Kubernetes Engine and Cloud SQL.
- Operated HashiCorp Vault for centralized secrets management across GKE workloads and on-premises services, maintaining secure credential injection across environments.
- Sustained DevOps delivery (ArgoCD, Helm, GitLab CI/CD) for production deployments after a team departure, keeping existing GitOps workflows running across a hybrid on-prem and GCP network.

PT. Magpie Data Indonesia, Remote — Cloud Infrastructure Engineer

FEB 2023 - JUN 2025

- Reduced monthly infrastructure costs by ≈60% (≈90M → ≈30M IDR; ≈\$5,100 → ≈\$1,700) by migrating Prefect batch orchestration from always-on VMs to Kubernetes on GKE with spot instances.
- Migrated Apache Airflow workloads to GKE, ending recurring resource-exhaustion outages on standalone VMs.
- Built and operated a multi-node Proxmox cluster (50+ VMs across two sites) provisioned entirely with Ansible, and connected the fleet with a self-hosted ZeroTier controller — no recurring VPN licensing.
- Built centralized monitoring and alerting with Prometheus, Grafana, Loki, and Alertmanager with automated Discord notifications. Enforced TLS/HTTPS across services, self-hosted Passbolt credential management, and least-privilege IAM with regular access reviews.
- Resolved critical production incidents including database disk exhaustion and storage overflow, and wrote the operational runbooks used by the team.

Education and Certifications

- | | |
|--|-----------|
| • Diponegoro University — Bachelor of Science in Physics | 2018-2022 |
| • Google Cloud: Associate Cloud Engineer Certification – Link | 2024 |
| • Google Cloud: Professional Cloud Architect Certification – Link | 2026 |
| • Google Cloud: Professional Cloud DevOps Engineer Certification – Link | 2026 |

Technical Skills

- Cloud & Containers: GCP, AWS, Alibaba Cloud, Kubernetes (GKE), Docker, Helm
- Infrastructure as Code: Terraform, Ansible
- CI/CD & GitOps: GitLab CI/CD, GitHub Actions, ArgoCD, Jenkins, Git
- Observability: Prometheus, Grafana, Loki, Alertmanager
- Security & Systems: HashiCorp Vault, Passbolt, IAM least-privilege, TLS/HTTPS, Proxmox, Linux (Debian/Ubuntu)
- Languages: Python, SQL, Bash · Indonesian (native), English (professional working proficiency)
